Dear Parents/Guardians,

As the school year unfolds, and cases of COVID-19 are diagnosed within our school community, we remind parents of the following:

- We may receive confirmation of a positive test result at any time during the school day, and if your children are determined to be close contacts of the person who has been diagnosed, they and/or their class/cohort will be isolated immediately;
- Parents/guardians will then be required to pick up their children. This could happen on very short notice. Please ensure your contact information is up to date at the school, and that someone is available to pick up your child; and
- If we hear of a confirmed case outside of regular school hours, and your children are determined to be close contacts, we will be in touch as soon as possible to advise that your children will be unable to attend school the next day and must begin an isolation period. Again, please ensure your contact information is up to date and that you have a plan in place to have your children at home for two weeks, should this situation arise. This too may happen with very little notice.

We know this is not an easy time for families and thank you for your patience. We also know that by being prepared and working together to follow the guidelines in place, we can help limit the spread of COVID-19. If you have any questions, please contact Mrs. Warmington at 780-923-2898.

Sincerely,

Mrs. Warmington, Principal
